

TSC Auto ID Technology Co., Ltd.

The company's measures and implementation report for the community in 2025

The company has always upheld environmentally friendly values. While pursuing business growth, we not only comply with environmental regulations but also actively maintain good relationships with our neighbors and community, participate in local environmental initiatives, and build strong community ties. Our factory is located in the Lize Industrial Park in Yilan, and most of our employees are locally hired from Yilan County. We support community development by engaging in public welfare activities and local infrastructure projects, aiming to minimize the negative impact of our operations and promote harmonious and mutually beneficial coexistence with the community. In 2025, we invested resources to collaborate with local public welfare groups to organize activities that foster good neighborly relations.

1. Cooperated with the Huashan Foundation to hold a "Caring for and Visiting Seniors Living Alone" event in Su'ao, Yilan County.

Through chatting and showing care, we checked on the seniors' medication, meals, physical condition, recent special events in their lives, and reminded them about daily care, all to provide companionship and support. The activities included back massages, blood pressure checks, care visits, and memory-loss prevention card games. The whole event lasted about 4 hours, visiting 10 seniors.

2. Collaborated with the Genesis Foundation to hold the 'Step for Love, Walk for Sustainability' event at Luodong Sports Park in Yilan County.

Sponsored 1,200 diapers for 20 vegetable patients. Promoted healthy exercise and social welfare, spreading love and building a sustainable community.
