Linerless Labels

Unlike traditional pressure sensitive labels that rely on silicon liners to keep labels from sticking to themselves, linerless labels serve as their own liners. This is accomplished by applying a release coating to the top of the label facestock.

Benefits of Linerless Labels

- **More Sustainable** – No liner waste in landfills
- **More Labels per Roll** – Without liners rolls can hold up to twice as many labels
- **Decreased Storage and Shipping Costs** – More labels per roll leads to fewer rolls and lighter freight loads
- **Faster Application** – Users don't have to spend time removing liners

Custom Linerless Labels

Genuine Supplies linerless labels are made up a high-sensitivity and heat-resistant direct thermal paper for excellent UV resistance. The proprietary adhesive is designed to provide good temporary adhesion to a wide variety of substrates. These versatile labels are available for mobile and desktop printers:

Desktop: Label width up to 4" / 1" core / 5" OD

Mobile: Label width from 1" -4.4" / .75" core / 2.625" OD

Markets for Linerless Label

Our linerless labels provide excellent image sharpness and durability for customers including:

- Retail
- Food Service
- Hospitality
- Field Services
- Warehouse & Distribution

Recommended printers: DA220, Alpha-2R, Alpha-30L, & Alpha-40L
