

# The Right Labeling Materials For Your Needs

## Horticulture Tags

TSC Printronix Auto ID Genuine Supplies offers custom horticulture tags for customers including growers, commercial greenhouses, nurseries and retail markets.

Whether you're labeling produce fresh from the field or boxes from the manufacturer, it is important that each item is properly labeled. Unreadable barcodes can result in refused or lost shipments, compliance fines and ultimately lost revenue.

### Pot Stakes

Custom pot stakes are the ideal solution for easy plant identification. Designed for long-term greenhouse/field use, they are widely used by growers needing 12 or more months of identification. Our custom plant stakes are available in 12, 20, and 22 mil (0,3 mm, 0,51 mm, 0,56 mm) thicknesses.

We offer 7 different colors in a wide variety of sizes. Made of a premium, rigid material, our pot stakes are easy to print, utilizing the TX300, MH261T, TTP-247, T4000, and T6000e.

They can also be preprinted to include full color graphics for product marketing or customer education.

## RFID Pot Stakes

With RFID plant stakes, growers can easily track, count and manage inventory in real time. We offer 4.5 to 6-inch wide, RFID plant stakes, available in rolls of 1,000 with a 3-inch core. These tags feature an RFID inlay at the top of the stake for improved readability in the field. They can be printed and encoded using the T4000 (4-inch RFID stakes) and T6000e (4 and 6-inch RFID stakes).

<b>RFID Protocol</b>	RAIN / UHF (GS1 / ISO 18000-63)
<b>Tag Type</b>	Passive Read/Write
<b>Read Range</b>	Up to 30 ft. (depends on tag and reader type)
<b>Frequency Range</b>	902 ~ 928 MHz
<b>EPC Size</b>	128 Bits - others available upon requests

## Wrap Around Tags

Our custom wrap around tags are designed to easily attach directly to a stem or branch without the need for strings or ties. These tags are the perfect solution to identify plants, shrubs and trees.

Our custom wrap around tags are available with or without RFID inlays.
